400 Series Centrifugal Exhausters

At the heart of every AutoVac central cleaning system is our powerful Centrifugal Vacuum Producer. The 400 Series turbine is a multistage exhauster available from 7.5 to 25 hp depending on your needs. It's engineered for years of reliable performance with very little maintenance. We manufacture our 400 Series in-house in accordance with strict production standards. Combine the 400 Series with an AutoVac separator, engineered piping, and customized electronic motor controls for the most reliable vacuum system available.
