600 Series Centrifugal Exhausters

At the heart of every AutoVac central cleaning system is our powerful Centrifugal Vacuum Producer. The 600 Series turbine is a multistage exhauster available in 25 and 30 hp depending on your needs. It's engineered for years of reliable performance with very little maintenance. We manufacture our 600 Series in-house in accordance with strict production standards. Combine the 600 Series with an AutoVac separator, engineered piping, and customized electronic motor controls for the most reliable vacuum system available.
