Self serve vacuums, your way . . .

Standalone Self Serve

Available with one or two hoses

Finally, self serve vacuums from AutoVac – the brand you trust, prices you’ll love.

- **Affordable** – we follow “lean manufacturing” practices and pass the savings along to you
- **Quick Delivery** – units are in stock and ready to ship
- **Durable & Dependable** – high quality construction and components ensure long equipment life
- **Easy to maintain** – double service doors and quick-change, high-capacity filter bags make maintenance a breeze
- **Flexible** – Can be used as free vacuums or pay-per-use
- **Get exactly what you need** – choose the features that work for your wash (additional motors, electronic currency acceptors, custom mounting hardware, in-ground vaults, etc.)
- **Design your vacuum area** – Create an inviting all-in-one vacuum area with the affordable Freedom Truss canopy system (see back for more details)

Centralized Self Serve

Available with one or two hoses

Get the best of both worlds with centralized self serve vacuums. They look like traditional vacuums, but deliver the benefits of central vacuum systems. Instead of multiple standalone vacuums, suction is provided by one powerful vacuum turbine in your equipment area.

- **Extremely durable** – lasts up to 10 times longer than traditional standalone vacuums
- **Energy efficient** – uses a fraction of the energy consumed by standalone vacuums (be sure to ask for VacuumIQ™, the Intelligent Vacuum Controller)
- **Cost savings are exponential** – reduces “peak demand” for electricity so you can cut energy costs for your entire site
- **Low maintenance** – central vacuums are industrial workhorses, designed to go the distance
- **Quiet to operate** – the vacuum motor is located in an equipment area – customers hear only the suction
- **Flexible** – can be used as free vacuums or pay-per-use
- **Customize, customize, customize** – engineered site plans are available so you get exactly what you need
- **Create an inviting vacuum area** – ask about our Freedom Truss System, the all-in-one canopy/piping solution

Add Vacuum IQ™ to your centralized system for huge energy savings.

Self Serve Vacuums: Features and Options

	STANDARD FEATURES	OPTIONS & UPGRADES
MOTORS (Standalone Vacuums)	Two 900 Watt electric, two stage, bypass, 7 amps each.	Explosion-proof motors, “whisper quiet” package, third motor add-on.
MOTORS (Centralized Vacuums)	Central vacuum producer, horsepower determined by number of simultaneous users.	Vacuum IQ™ motor control, explosion-proof motors, “whisper quiet” package.
FILTRATION	Quick-change high capacity filter bags.	Clean out bag, specially lined filter bags.
CURRENCY ACCEPTORS	Mechanical coin acceptor, constructed of stainless steel.	Electronic coin acceptors, bill acceptors, combination coin/token acceptors.
COIN VAULT	High security coin vault ensures maximum security.	In-ground vault and connections.
TANK	18 gauge stainless steel with continuous welded seams.	Choice of select automotive grade multi-part urethane top coat over industrial grade primer.
HOSE	Black crushable plastic, 1½ inch diameter, 15 feet long. Durable hand tool and rubber cuff included.	Various colors, 2 inch diameter, tapered design (2 to 1½ inch).
MOUNTING	Pedestal floor mount with three point leg design and isolator pads to prevent rocking.	Pole mount. See below for Freedom Truss options.
ACCESS DOORS	Two lockable service doors with leak-proof “U” channel gaskets.	High security vaulted service doors.

Units in stock, ready to ship.
