

## Providing Solutions through Central Vacuum Systems

**AutoVac Industrial Vacuum and Air Systems develops, implements and supports highly efficient, extremely durable central vacuum systems for a host of industries and applications.**

### **The AutoVac Story**

AutoVac was founded in 1989 to provide central vacuums to the car wash industry. From these modest beginnings more than twenty years ago, AutoVac has grown into a world-class manufacturer, serving the vacuum requirements of thousands of companies in various industries around the globe. AutoVac's central vacuum systems are found in aerospace, car care, material handling, manufacturing, medical applications and more. Boeing, Toyota, Honeywell, Xerox, Enterprise Rent-A-Car, Gulfstream, International Game Technology, and Penske are just a few of the companies who rely on AutoVac's expertise and commitment to quality.

AutoVac manufactures nearly all its own components to ensure high quality and affordability. This also allows AutoVac the freedom to explore and develop new technologies and take them from concept to production with remarkable speed.

AutoVac is committed to helping its clients reduce energy consumption, improve efficiency, and boost productivity. AutoVac has developed a new breed of "smart" central vacuum systems. They are extremely energy-efficient and environmentally friendly.

This unique combination of cutting-edge technology and decades of experience in centrifugal vacuums has earned AutoVac a reputation as *the* source for cost-effective, energy-efficient, central vacuum systems.

## Applications

- Vacuum Cleaning
- Dust Collection
- Material Collection
- Clean Room Debris Collection
- Chip Collection
- Wood Dust Collection
- Dustless Sanding
- Liquid Pickup
- Bakery Flour Collection and Conveying
- Welding Fume Exhaust
- Conveyor Line Cardboard and Dust Collection
- Bulk Material Handling and more

## Industries and Customers

- Aerospace
- Manufacturing Facilities
- Bottling Plants
- Textile Mills
- Food Processing
- Petroleum
- Metal Finishing
- Foundries
- Pharmaceuticals
- Bakeries
- Car Washes
- Rental Car Facilities
- Car Dealerships
- Circuit Board Manufacturing and more

## Services

- Consultation and design
- Engineer Certified CAD Drawings
- Professional Installation
- Maintenance and Support Programs
- New Product Development

## Products

- Vacuum Producers
  - 300 Series Centrifugal Vacuum Producers
  - 400 Series Centrifugal Vacuum Producers
  - 600 Series Centrifugal Vacuum Producers
  - 800 Series Centrifugal Vacuum Producers
  - Direct Drive Centrifugal Vacuum Producers
  - Portable Vacuums
- Filtration Devices
  - Filter Separators
  - Primary Separators
  - Hopper Separators
  - Cyclonic Separators
  - Hybrid Separators
- Piping, Support Structures and Attachments
  - Customized Piping (ABS, Steel, Zinc, Aluminum)
  - Prepackaged Piping Kits
  - Freedom Truss Modular Canopy and Support/Shade Structures
  - Brushes, crevice tools, wide angle floor brushes, etc.
  - Customized Attachments
- Advanced Motor Controls and Software Programs
  - Vacuum IQ™, The Intelligent Vacuum Controller
  - Dryer IQ™, The Intelligent Dryer Controller
  - IntelliVac™ Metering Device for Vacuum on Demand
  - Vacuum Logic™ Remote Monitoring Software
  - Magnetic Starters, Disconnects, and other electrical components
- Vacuum/Separator Combination Units
  - Liberty Vacuum Systems
  - Gemini Vacuum Systems
